**REPLY TO NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT**  
**APPLICATIONS CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID**  
**SEQUENCE DISCLOSURES**

This reply is responsive to the attached Notice to Comply of August 15, 2006.

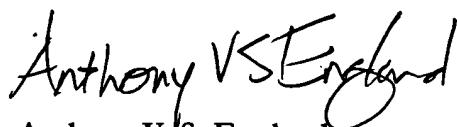

On July 28, 2006, Applicant submitted a reply to a Notice to Comply with Requirements for Patent Applications containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, dated June 29, 2006, in which Applicant amended the drawings and the specification of the originally filed application in order to conform them to the correct format. In that reply, Applicant also provided i) a written sequence listing corresponding to the sequence listings in the specification and drawings, and ii) a computer readable copy thereof (compact disk). However, the present Notice to Comply of August 15, 2006, indicates that i) the previously submitted written sequence listing and computer readable copy thereof are not in the proper form, and ii) a required statement regarding no new matter was omitted. The present reply is to correct the written sequence to accompany the specification and computer readable copy thereof and to provide the required statement regarding no new matter.

**STATEMENT REGARDING NO NEW MATTER**

The information recorded in the enclosed computer readable form is identical to the enclosed written sequence listing. No new matter is included in the amendments to the specification and drawings submitted in Applicant's reply of July 28, 2006 nor in the enclosed written sequence listing and computer readable copy thereof, since the application as originally filed provides support.

Applicant submits that the invention as claimed in the originally filed application is patentably distinct and hereby requests that the Examiner grant allowance and prompt passage of the application to issuance.

Respectfully submitted,
